**Explanation of Other Funds:**

MIC received \$500,000 from the BIA IRR year end funds to complete the design mix and crushing for the entire Waldon Point road. MIC added \$400,000 to the fund to complete the funds for the crushing contract.

**Detailed Project Description and Justification:**

The national significance of this project was to provide valuable construction training for the military under adverse conditions. Every branch of the service sends men to Annette Island and Waldon Point for training. The state significance is that the road will cut the State's ferry investment to service Metlakatla; instead of a 1.5 hour run, it will be 20 minutes. This road will help in the economic development of Metlakatla. We will be able to truck our goods and services to the major hub rather than send by boat or barge. Our people can get jobs in Ketchikan and drive home every evening (and vice versa). This will open up educational opportunities to attend UofA Southeast. This will help in the medical fields when we have emergencies and we always face adverse weather.

**Project Timeline:**

Project will begin in May of 2010 and will be complete by October 2010.
